INTRODUCING

EVERYTHING DiSC® MANAGEMENT

Everything DiSC® Management teaches managers how to bring out the best in each employee.

Everything DiSC Management is classroom training that uses **online pre-work, engaging facilitation** with **contemporary video** to create a personalized learning experience.

Using DiSC®, a simple and intuitive learning model, participants recognize and understand the styles of the people they manage. The result is managers who adapt their styles to **manage more effectively**.

KEY TOPICS

Everything DiSC Management focuses on five vital areas:

Introduction to Your Management Style: Participants discover how their DiSC styles affect their management styles, examining their unique priorities as managers. Participants then learn how to identify the DiSC styles of the people they manage.

Directing and Delegating: Participants learn their strengths and challenges when directing and delegating. And they learn how to adjust to fit the needs of the people they manage.

Motivation: Participants discover how their DiSC styles affect the motivation of others. And they learn to identify and adapt to increase others' motivation.

Developing Others: Participants learn about their natural styles of developing others. They also discover the development preferences for each DiSC style and how to accommodate each style.

Working with Your Manager: Participants learn to modify their approach to meet the needs and preferences of their bosses. They increase their ability to influence and communicate effectively with their managers.

EVERYTHING DiSC®
